

## ECOPROTECT

Ecoprotect panels are mainly used to protect the lawns of football pitches, golf courses or racetracks... Ecoprotect panels let in light, water and air.

In addition to the public, light loads such as pallet trucks, flycases, prosceniums or small stages (but not heavy loads), can circulate or be mounted on Ecoprotect panels.

### Technical specifications

- **Material:** PEHD polyethylene, with UV stabilizer
- **Colour:** Naturally translucent, letting light through
- **Surface:** Non-slip
- **Dimensions:** 1.00 m X 1.00 m x 60 mm - pre-assembled in panels of 2,00m x 2,00 m
- **Weight:** 8.3 kg per m<sup>2</sup> or 33.20 kg pre-assembled panel
- **Permissible load:** 400 kg per m<sup>2</sup>, depending on the characteristics and type of ground.
- **Transport:** 12 pallets of 20 panels, or 960 m<sup>2</sup> per articulated lorry.

### Properties

- Ecoprotect panels are easily installed.
- A locking system allows the panels to be assembled together.
- This locking system requires a specific locking key.
