

PISTECO

Pisteco panels are mainly used to create accesses, car parks and temporary platforms ...

They can be laid on different types of ground, whether more or less solid.

Thanks to their design and robustness, they have a permissible load of up to 80 tons / m².

Technical specifications

- **Material:** Polystone + PVC panels
- **Colour:** Anthracite grey
- **Surface:** Non-slip profile
- **Dimensions:** 8.64 m² - 2.40 m x 3.60 m x 35 mm
- **Weight:** 350 kg/panel
- **Permissible load:** 80 t/m² depending on the type of ground
- **Transport :** 80 panels per articulated lorry, ie 691 m²

Properties

- Pisteco panels are interconnected with shackles.
- The shackles are fixed to the lifting plates of the panels.
- They can also attach laterally to create platforms.
- These panels are ideal for events, concerts, festivals and construction sites, as well as for pedestrians and all types of vehicles.
