

REMOPLA (120)

Remopla panels are mainly used to effectively protect stabilized ground.

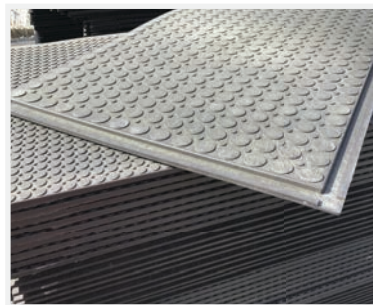

They can be installed on tartan tracks, tennis courts, hall floors, asphalt...

Weighing only 24 kg, Remopla code 120 is easily installed by hand.

Technical specifications

- **Material:** Recycled PVC
- **Colour:** Anthracite grey
- **Surface:** Non-slip profile
- **Fire classification:** Bfl-s1 (in compliance with standard NF EN13501-1 + A1: 2013)
- **Usable area:** 0.88 m²/panel - 1160 mm x 760 mm x 22 mm
- **Overall dimensions:** 1200 mm x 800 mm x 22 mm
- **Weight:** 24 kg/panel
- **Permissible load:** 19 tons/m² depending on the nature and condition of the ground
- **Transport:** 50 panels / pallet, 20 pallets per articulated lorry, ie 860 m²
- **Accessories:** Ramps

Properties

- Solid one-piece construction.
- The panels are laid in staggered rows and fit together thanks to a system of male and female edges.
- This panel is reversible and both sides can be used.
- Installation does not require the use of specific tools.
- They allow accessibility to pedestrians, people with reduced mobility and light and heavy-goods vehicles.
