

## STEEL PANELS

Steel panels are mainly used to build accesses and create platforms for heavy loads.

They can be installed on different types of non-sensitive ground.

They allow intensive use of heavy vehicles on the installed surfaces.

### Technical specifications

- **Material:** steel
- **Colour:** steel
- **Surface :** smooth
- **Dimensions :** 6.48 m<sup>2</sup> / panel - 1.80 m x 3.60 m x 13 mm
- **Weight:** 700 kg / panel
- **Permissible load:** 100 t/ m<sup>2</sup> depending on the type of ground
- **Transport:** 35 panels per articulated lorry, ie 227 m<sup>2</sup>

### Properties

- The steel panels are placed next to each other with a slight overlap.
- They can be laid with a crane or forklift.
